## REASONS FOR ALLOWANCE

1. Claims 1-27 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The applicant has recited in the Appeal Brief filed 12/11/2007 that the element 84 is only a yoke assembly, which could not be read as the second rotation member; and the examiner's highly legalistic interpretation of the wording "external light outlet" stretches the claims beyond their ordinary meaning. These have been found persuasive.

Therefore, claims 1 and 14 recite a second rotation member which is rotatable with respect to the first rotation member about a second rotation axis and which has an external light outlet for emitting light originating from the light source, which are not disclosed or suggested by the prior of record.

Claims 2-13 and 15-20 are dependent on claims 1 and 14, respectively.

Regarding claim 21, the applicant argued in the Appeal Brief filed 12/11/2007 that the element 84 could not be read as the second rotation member as explained with respect to claim 1, and the prior art of record fails to meet the first rotation mechanism (being) at an exterior of the first housing, and the means is within the (second) housing of the second rotation member. These have been found persuasive. Therefore, claim 21 is patentable over the prior of record.

Claims 22-27 are dependent on claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
